

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): An aqueous water- and oil-repellent dispersion comprising:

(A) a homopolymer or copolymer comprising at least one polymerizable compound having a perfluoroalkyl or perfluoroalkenyl group and an acrylate or methacrylate group, or a copolymer comprising said polymerizable compound and another compound copolymerizable therewith, and

(B) a surfactant which comprises a cationic surfactant and a nonionic surfactant of the formula (I):

wherein  $R^1$  is a branched alkyl or alkenyl group including a main chain having at least 5 carbon atoms and three-of or more side chains having a total of at least 3 carbon atoms in all side chains,

a is an integer of at least 3, and

b is an integer of 10 to 30.

2. (previously presented): The dispersion according to claim 1, wherein, in  $R^1$  of the formula (I), each side chain is an alkyl group.

3. (original): The dispersion according to claim 1, wherein  $R^1$  in the formula (I) has at least 10 carbon atoms.

4. (previously presented): The dispersion according to claim 1, wherein, in R<sup>1</sup> of the formula (I), each side chain is an alkyl group having 1 to 3 carbon atoms.

5. (previously presented): The dispersion according to claim 1, wherein, in R<sup>1</sup> of the formula (I), each side chain is a methyl group.

6. (original): The dispersion according to claim 1, wherein R<sup>1</sup> in the formula (I) is a C<sub>13</sub> isotridecyl group having 4 side-chain methyl groups, that is,

7. (original): The dispersion according to claim 1, wherein R<sup>1</sup> in the formula (I) is a C<sub>13</sub> isotridecyl group having 6 side-chain methyl groups, that is,

8. (original): The dispersion according to claim 1, wherein R<sup>1</sup> in the formula (I) is a C<sub>13</sub> isotridecyl group having 3 side-chain ethyl groups, that is,

9. (original): A method of processing a textile, comprising using the dispersion according to claim 1.

10. (original): A textile, to which the dispersion according to claim 1 is applied.
